

Complete Engineering  
e-mug Technologies Pvt Ltd.

### **CAM (Computer Aided Manufacturing)**

In a constantly fluctuating marketplace that demands innovation, reduce time to market, businesses need to align with a partner who has the technology and domain skills. It is here, our domain expertise, credibility of having dealt with various projects and the latest technology in place can help you improve processes and productivity in your organization.

Our strong domain expertise with hands on experience in the Manufacturing sector enables us to provide cost-effective solutions for clients in different areas of manufacturing. Our core strengths lie in the following

- ◆ Expertise in cutting-edge CAM technologies that have helped us to maintain an edge over our competitors
- ◆ Expertise in handling the most complex Computer Aided Manufacturing - CAM requirements that range from system selection, setup and integration consultations to solid model developments and CNC tool path generation
- ◆ Proven skills in the mechanical engineering industry have enabled us to provide professional and quality services in the CNC Programming

### **We offer solutions in the following cases:**

- ◆ NC Tool Path Generation and simulation in various axis modes
- ◆ 2D Machining
- ◆ 3-Axis, 4-Axis & 5-Axis Machining
- ◆ Manufacturing process development
- ◆ High Speed Machining (HSM)
- ◆ Mould, Die, Jigs and Fixture Design
- ◆ Electrode Modeling and Machining

Our solutions offer increased productivity, improved quality, increased flexibility, reduced cost, reduced lead times and decreased inventory levels.
